

X RAY STANDS

These x ray stands are designed for the new generation portable x-ray units such as the Minxray HF 80.

It is completely manufactured of stainless steel, and features:-

- Complete mobility on a caster base, with caster locks.
- Wind up height adjustment, from floor level, and to give a focal length of 750 mm + above a 900mm high table.
- An adjustable length control arm to which the x-ray unit is attached.
- A positive locking system to ensure that the height adjusted to is maintained.
- A very simple attachment system, so that the x-ray machine can be mounted or demounted in 30 seconds, with the turn of one hand wheel.
